Construction details

Roof material

External wall construction

Floor construction

Internal wall construction

Roof colour

External wall colour

Floor covering colour

Internal wall colour

Other construction details (describe)

Windows and doors

Window Manufacturer (if known)

Glazing type

Frame

External Blinds (if required)

Other (describe)

Insulation preferences

(indicate R-Value if known)

External wall foil	Roof Insulation	R-Value	Ceiling Insulation	R-Value	
External wall insulation	R-Value	Internal wall insulation	R-Value	Floor insulation	R-Value

Service connections

Tick which of these services will be connected

Connected to the grid	Solar PV	Natural Gas	LPG (bottled gas)	Reticulated alternative water supply
Town water	Bore water	Rainwater tank	Grey water tank	Hot water recirculation or diversion system

Water Heating appliances

Type	Capacity	Fuel source	STC
------	----------	-------------	-----

Heating appliances

Living areas Heating Type	Bedroom areas Heating Type	Fuel source	Other information
---------------------------	----------------------------	-------------	-------------------

Cooling appliances

Living areas Cooling type	Bedroom areas Cooling Type	Fuel source	Other information
---------------------------	----------------------------	-------------	-------------------

On-site energy generation

Type	Capacity	Fuel source	Other information
------	----------	-------------	-------------------

Cooking appliances

Type	Fuel source
Cooktop	Electricity Gas Induction
Wall Oven	Electricity Gas
Upright stove	Electricity Gas

Pool

What is the volume in kiloliters?	What is the location?	Will it be covered?	Will it be shaded?	Will it be heated?
-----------------------------------	-----------------------	---------------------	--------------------	--------------------

Spa

What is the volume in kiloliters?	What is the location?	Will it be covered?	Will it be shaded?	Will it be heated?
-----------------------------------	-----------------------	---------------------	--------------------	--------------------

Downlights, Exhaust Fans,Ceiling Fans (if not detailed on plan) and Floor Covering

Please note: It is preferable to provide an electrical plan if possible. requirements dictate we have to indicate ceiling penetrations created by downlights, exhaust fans etc. In NSW NatHERS assessments are required at DA stage, lighting plans often are not necessary. However, given the requirements, if downlights and exhaust fans are added to the dwelling at construction and are not listed in the Universal Certificate, the certificate is NOT VALID and a new certificate will be required. (This is at the discretion of the certifier)

Location	Downlights			Exhaust fans		Ceiling fans		Floor covering
